BERT

Datasets → Tokenizer → Transformers → Datasets

Load and process datasets

Tokenize input texts

Load models, train and infer

Load metrics and evaluate models

>> What is the definition of NER?

One-Hot Encoding

```
>> import torch
>> import torch.nn.functional as F
>> input_ids = torch.tensor(input_ids)
>>one_hot_encodings = F.one_hot(input_ids, num_classes=len(tokenizer))
```

lexicon ≈ Dictionary

Last Hidden state

```
>> outputs.last_hidden_state.size()
```
